INTRODUCTION

The Directory of Canadian Manufactured Marine Equipment for Shipbuilding (CMMES) has been prepared to bring Canadian products and manufacturers to the attention of ship designers and shipbuilders and to promote the use of Canadian marine products. The directory and the data base from which it is derived will be used to develop interest in Canadian marine equipment for export through referrals of sourcing requests received from Canadian trade representatives abroad and other sourcing requests received by the Marine Systems Division, Department of Regional Industrial Expansion (DRIE).

Although some of the information may already be known to Canadian ship designers and shipbuilders, the directory will serve as a reminder of the availability of Canadian equipment and focus attention on new listings and companies. Companies not listed in the directory are encouraged to contact the Marine Systems Division at the address below, in order to be included in the data base.

The directory has two parts: the first part provides an alphabetical listing of marine products; the second an alphabetical listing of companies. For each product listed in part one, the names of the manufacturers of record are provided, as well as the page number in the second part where information on that company may be found. For each company listed in part two, the Canadian manufactured products of record are listed along with details for contacting the company.

The information in this directory has been compiled from various sources, including the results of the 1986 marine survey conducted by the Business Opportunities Sourcing System (BOSS) of DRIE. The information collected by BOSS on marine equipment products and sources will also be listed in the various BOSS media.

Update information will be requested periodically by BOSS to maintain the data base, and a new edition of the directory will be printed when changes and new entries warrant.

Where information has been supplied by a company in response to the BOSS survey, the following symbols are used:

- * - the company is classified as a small business by Supply and Services Canada (i.e., for a manufacturer, fewer than 100 employees)
- E - the company has been actively engaged in or is interested in exporting one or more of its products.

Please use the form at the back of the directory to indicate errors or omissions, add new entries or update your company's listing.

LISTE DE PRODUITS

Pour identifier une information apportée par une compagnie en réponse à l'enquête du RADAR, on utilise les signes suivants :

* - l'entreprise est considérée comme une petite entreprise selon les critères d'Approvisionnements et Services Canada, (i.e., elle emploie moins de 100 personnes).

E - l'entreprise a déjà exporté un ou plusieurs de ses produits, ou elle est intéressée à le faire.

Veuillez utiliser le formulaire au dos du répertoire pour mentionner les erreurs ou les oublis, ajouter une nouvelle donnée ou mettre à jour les renseignements touchant votre entreprise.

Division des réseaux de transport maritime
Direction générale des transports routier, maritime et
ferroviaire
Ministère de l'Expansion industrielle régionale
235, rue Queen
Ottawa (Ontario)
K1A 0H5

Téléphone : (613) 954-3760

Le Répertoire de l'équipement fabriqué au Canada pour la construction des navires a été préparé à l'intention des concepteurs et des constructeurs de navires, afin de faire connaître les produits fabriqués au Canada et d'encourager leur emploi. Cet ouvrage et la base de données dont il est tiré serviront à susciter l'intérêt pour l'exportation de l'équipement naval canadien, en se fondant sur les demandes de renseignements faites par les délégués commerciaux du Canada et d'autres sources régues à la Division des réseaux de transport maritimes du ministère de l'Expansion industrielle régionale (MEIR).

Comme une partie des informations est déjà connue du secteur de la construction navale, le répertoire sert plutôt à rappeler qu'à faire connaître la disponibilité de matériel fabriqué au Canada et à attirer l'attention sur de nouvelles listes et entreprises. Si certaines entreprises ne figurent pas dans cette liste, il serait souhaitable qu'elles communiquent avec la Division des réseaux du transport maritime, à l'adresse indiquée à la page suivante, pour que leurs coordonnées soient entrées dans la base de données.

Ce document comprend deux parties : la première propose une liste alphabétique des produits; la seconde, une liste alphabétique des entreprises.

Dans la première partie, pour chaque produit énuméré, les noms des fournisseurs inscrits au répertoire ainsi que la page où on peut trouver des renseignements dans l'autre partie sont mentionnés. Pour chaque entreprise citée à la partie deux, les produits manufacturés au Canada sont répertoriés, de même que les coordonnées pour contacter les fournisseurs.

L'information recueillie dans ce manuel provient de différentes sources, dont les résultats du sondage de 1986 réalisé par le Réseau d'approvisionnement et de débouchés d'affaires (RADAR). Les renseignements fournis par RADAR sur les produits et les sources seront inscrits dans les documents appartenant à cette organisation. Ces informations seront mises à jour régulièrement afin de garder la base de données actuelle, et une nouvelle édition paraîtra chaque fois que les changements à apporter le justifient.
